

**What joins us is greater than what separates us.**

**Issue #2  
Spring 09**

It is in Nature that our deepest breath occurs. All of our senses fire and the color of our origin brings us home, not in path but in Soul.

We invite you to join us this month in becoming a part of the rich and remarkable aspects of the global shift to higher consciousness. To welcome spring, in this issue we invite you to scroll down and explore:

## **What's New at TheHarmonyProject.org**

- **The Sacred Path of Nature & Animism**
- **Duirwaigh: Opening the Door to Enchantment**
- **Planting Seeds of Change**

### **THEHARMONYPROJECT.ORG NEWS**

Since the launch of *Easy Access* last month, TheHarmonyProject.org has gone global, receiving many new visitors from Pakistan, Stockholm and around the United States. In addition, a link has been added on the Web site for you to support the HarmonyProject.org's all-volunteer efforts, and new links have been added to the Resources tab. Please visit us at [www.TheHarmonyProject.org](http://www.TheHarmonyProject.org)

### **Sacred Path: Nature & Animism**

Nature & Animism conceives of the Universe as filled with spirits, some taking form and others unseen. Children throughout the world readily accept that even though they can only catch glimpses of them, there are indeed fairies and elves dancing in the woods on full moon nights. In many traditions, the unusual appearance or behavior of an animal is interpreted as a sign directly from Spirit with important meaning.

[Enjoy a walk on this path.](#)

### **Duirwaigh: Opening the Door to Enchantment**

Duirwaigh (pronounced DOORWAY) in Gaelic means doorway, but not just any ordinary doorway. This one is in the trunk of an oak tree--and is a beckoning from the very tree itself into the realm of faerie and Beyond. To view the Duirwaigh Gallery's short (3-minute) film of inspiration, [Knock at the Door](#) now.

### **Planting Seeds of Change**

You can lessen your carbon imprint and eat healthier by planting a simple organic backyard or container garden [a 4'x4' space is an easy way to begin]. In 1989, Seeds of Change began with a simple mission: to preserve biodiversity and promote sustainable, organic agriculture. They offer an extensive range of quality, organically grown vegetable, flower, herb and cover crop seeds. Dig in here: [www.SeedsofChange.com](http://www.SeedsofChange.com)

Thank you for reading! I hope you enjoyed our Spring missive and that you'll forward this newsletter to your friends. Please join our mailing list at [www.TheHarmonyProject.org](http://www.TheHarmonyProject.org). Our goal is for it to circle the earth in a grid/web of love.

Thank you,

Nancy
